CCFI support and encourage the route to a Carbon Neutral Future.

It has been documented that around 22 million pieces of furniture are discarded each year in the UK, and the majority of this furniture is sent directly to landfill - we believe this needs to change!

3 SIMPLE STEPS

REDUCE, REUSE, & RESTORE FURNITURE

R **Reduce** –CCFI will re-upholster good quality furniture provided the items have been cleaned before collection. Re-upholstering furniture will help reduce the amount of wood used to manufacture new frames -while reducing our carbon footprint.

R **Reuse** –As well as wood, there are other materials that could be re-used while re-upholstering furniture including, foam and cushions which are still in good, clean, supportive condition.

R **Restore** -Being able to restore a piece of furniture helps massively to improve our own & our customers carbon footprints. This will really benefit the next generations long into the future.

On average, the process of manufacturing new furniture releases around 1000 times more carbon emissions than restoring the existing. By restoring your old furniture, you're helping to improve your own carbon footprint, and you'll be saving valuable resources!

OUR PROCESSES FOR ANY WASTE

- All green waste is collected by our contracted agent, Ace Liftaway – Licence CBDU92880
- Ace Liftaway also dispose of any old furniture, if SCF cannot re-use as some items are collected from our customers as part of our disposal service -to remove old furniture.
- Any waste timber and saw dust is collected by local restaurants for use in pizza ovens.
- Ink and printer products are collected by our supplier for specific recycling

Less than 1 in 10 people consider repairing their furniture to extend the life span!

That is why CCFI support any opportunity to re-upholster and restore an existing piece of furniture.

3 SIMPLE STEPS

TO RE-UPHOLSTER EXISTING FURNITURE

1

ONE –If you have decided to re-upholster existing furniture with CCFI, the first step is to send in photographs or for larger projects a CCFI Sales Agent will visit site

CCFI would expect the sofa to be professionally cleaned prior to collection –it is very important to ensure no cross contamination or infection.

2

TWO –Once the product for re-upholstery has been thoroughly cleaned, please contact CCFI to arrange a collection.

Normally the furniture is returned within 10 working days, depending on the volume of chairs or sofas. Larger volumes can be split over 2 /3 orders, to reduce any disruption with the Care Home.

3

THREE -As soon as the product has arrived back at the factory –the investigation can take place and we can advise what work needs to be carried out including replacements of any padding/ foam etc, unless a CCFI Sales Agent has previously visited.

CCFI will be able to help with fabric selections if required and will provide a quotation for your approval before any work is carried out.

* Should you decide against re-upholstery then a collection/ disposal / re-delivery charge will be payable.

Choose from a large selection of the required CRIB 5 Fire Retardant & Waterproof fabrics. CCFI offer a huge choice of Anti-Microbial Faux Leather & fabrics fit for the most challenging of healthcare environments.

CCFI now import kiln-dried timber from FSC managed forests in Poland to manufacture our upholstered furniture from scratch.

Huge investment has been spent on woodworking machinery and labour to produce our own frames, from raw timber to finished products.

In November 2019, another step was an investment in a CNC machine at £200,000 to enable SCF to now manufacture our own range of dining and coffee tables – thus negating the need to import from Europe.

CCFI aim is to only supply a customer base within 150 miles of our factories by December 2023, thus reducing our carbon footprint even further.

A WORKING PROCESS
THAT SCF ARE PROUD
TO AIM FOR. LETS GO
GREENER TOGETHER...
